The indicated allowability of claims 15-17 is withdrawn in view of the newly discovered reference(s) to Springett (USPN 5636032). Rejections based on the newly cited reference(s) follow.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15 and 17 are rejected under 35USC 102(b) as being anticipated by Springett. Springett discloses the same “first check step of checking quality of an image to be formed” because the number of pixels being rendered in a print job determines the quality/resolution of the image to be formed (see col.2, lines 39-40), “second check step of checking” the expected number of pages can be rendered (see col.2, lines 41-49) and user performs the “determination step of performing permissions determination” (see col. 5, lines 41-42) as claimed.

Claims 1-14 and 18-20 are allowable over prior art of record.
